Youssef CHLIH

AI & Data Science | Digital Innovation

youssefchlih.ai@gmail.com | +2126-654498 | youssefchlih.vercel.app | linkedin.com/in/youssef-chlih | Kenitra, Morocco

Profile

Final-year Bachelor's student in Big Data & Artificial Intelligence, currently interning at **HB Dev** on the **Mentora AI** educational platform, where I design databases and build **AI pipelines** (**LangChain**, **LangGraph**, **LangSmith**) for automated, data-driven content generation. Strong background in **data science, data analytics, and research**, combining Machine Learning, Deep Learning, Computer Vision and NLP with hands-on **data governance**, ETL, and Business Intelligence work (Talend, Power BI, SQL, OLAP). Experienced in translating research and analytics into practical digital solutions, developing training materials and dashboards, and supporting **digital transformation and innovation** initiatives. Fluent in English, French and Arabic; comfortable working in remote, cross-cultural, and fast-paced environments; motivated to apply AI and data analytics skills to advance **sustainable development** and global innovation initiatives such as the UNDP Digital, AI and Innovation Hub.

Professional Experience

HB Dev — AI & Data Engineering Intern April 2026 – Present
Tétouan, Morocco (Remote-compatible)

- Design and structure the **database** of the **Mentora AI** platform to organize and govern data flowing through the AI pipeline, applying **data governance** and data-quality principles
- Build **n8n** workflows (**Gemini VLM**, **Claude API**) and **Python** pipelines (**LangChain**, **LangGraph**, **LangSmith**) to automatically generate personalized, multimodal educational content and training materials, conducting iterative research to improve output quality

3D Smart Factory — AI Developer Intern February 2025 – June 2025
Mohammedia, Morocco

- Developed a **3D object classification** system using a **DGCNN** model trained on **ModelNet10**, applying research and analytics to model evaluation
- Designed an interactive **Streamlit** application for real-time classification, visualization, and insight generation

HardTech Maroc — AI Development Intern August 2024 – September 2024
Casablanca, Morocco

- Designed an automated Machine Learning system for detecting IT hardware failures, combining research with practical problem-solving
- Analyzed and pre-processed data to optimize the performance and reliability of predictive models

Projects

HireGenius — AI-Powered Intelligent Recruitment System 2025
Capstone Project

- Applied **NLP** to analyze and rank resumes/CVs by relevance to job requirements
- Combined **YOLOv8** facial-expression analysis with **CNN-BiLSTM** voice-emotion analysis to generate interview insights

Kwizy — Intelligent RAG-Based Quiz Platform December 2025
Personal Project

- Built an AI web application based on **Retrieval-Augmented Generation (RAG)** with **Python** and **Flask**
- Implemented a **CI/CD** pipeline with **Jenkins** and **Docker** using **Agile/Scrum** methodology and automated testing

Data Warehouse — LinkedIn Academic Program Analysis January 2026
Academic Project, EST Salé

- Modeled a **Data Warehouse** in star schema to research the relationship between academic programs and labor-market needs, supporting evidence-based policy insight
- Built a complete **ETL** pipeline with **Talend Open Studio** on 7,700+ records, including **data governance** and data-quality controls
- Delivered **Power BI** and **SQL** dashboards with business KPIs and **OLAP** analysis (slicing, dicing, drill-down) to communicate insights to stakeholders

Education

B.Sc. Big Data & Artificial Intelligence (Final Year) 2025 – 2026
EST Salé

Associate Degree, Artificial Intelligence & Data Engineering 2023 – 2025
EST Nador

High School Diploma, Mathematical Sciences 2022 – 2023
Lycée Moulay Rachid

Certifications

- **Oracle Cloud Infrastructure 2024** — Foundations Associate
- **Generative AI Professional** — Oracle Cloud Infrastructure 2025
- **The Machine Learning Process A–Z** — 365 Data Science

Technical Skills

AI, Data Science & Analytics
Machine Learning, Deep Learning, NLP, GANs, LLMs, RAG, Data Analytics, Predictive Modeling, Research

AI Pipelines & Orchestration
LangChain, LangGraph, LangSmith, n8n, Gemini VLM, Claude API

Computer Vision
OpenCV, YOLOv8, 3D CNN, Pillow

Data Governance & Business Intelligence
Talend, ETL, Data Modeling, Data Governance, Power BI, Advanced SQL, OLAP

Programming Languages
Python, Java, JavaScript, Scala

Databases
SQL, PostgreSQL, MongoDB, Redis, Cassandra, Neo4j

- **Python Programmer Bootcamp** — 365 Data Science
- **Intro to Data Science** — Cisco Academy
- **MLOps Level 2** — Coursera

Languages

English	Fluent
French	Fluent
Arabic	Native

Web & APIs
HTML, CSS, React, FastAPI, REST APIs

DevOps & Infrastructure
Git/GitHub, Docker, Kubernetes, Jenkins, GitLab CI, Terraform, CloudFormation

Core & Interpersonal Skills
Digital Transformation, Innovation, Capacity Building, Teamwork, Communication, Analytical Thinking, Adaptability, Time Management, Problem-Solving, Autonomy, Rigor
